

CVUSD Board Policy

BP 5141.22

Students

Infectious Diseases

The Governing Board desires to protect students from risks posed by exposure to infectious diseases while providing an appropriate education for all students. The Board recognizes that prevention and education are the most effective means of limiting the spread of infectious diseases.

Infectious Disease Prevention

Note: In order to help protect the safety of students and staff, the Centers for Disease Control and Prevention recommend that districts develop contingency plans for dealing with an infectious disease outbreak, such as a pandemic influenza. These contingency plans should be incorporated into the district's emergency and disaster preparedness plan. See AR 3516 - Emergencies and Disaster Preparedness Plan.

The Superintendent or designee shall collaborate with parents/guardians and local health agencies and organizations to develop a comprehensive approach to disease prevention that promotes preventative measures and education of students and staff.

(cf. 1020 - Youth Services)
(cf. 3516 - Emergencies and Disaster Preparedness Plan)
(cf. 5141.21 - Administering Medication and Monitoring Health Conditions)
(cf. 5141.26 - Tuberculosis Testing)
(cf. 5141.3 - Health Examinations)
(cf. 5141.31 - Immunizations)
(cf. 5141.32 - Health Screening for School Entry)
(cf. 5141.6 - Student Health and Social Services)

The Superintendent or designee shall regularly review resources available from health experts to ensure that district programs are based on the most up-to-date information.

The Superintendent or designee shall ensure that the district's comprehensive health education program provides information about the prevention of infectious diseases, including the nature of bloodborne pathogens and their transmission, as well as information to help prevent the spread of contagious diseases, such as a pandemic influenza. He/she shall also ensure that each school has sufficient infection prevention supplies that are easily accessible to staff.

(cf. 6142.1 - Sexual Health and HIV/AIDS Prevention Instruction)
(cf. 6142.8 - Comprehensive Health Education)

Universal Precautions

Note: Pursuant to 8 CCR 5193, employers with one or more employees having occupational exposure to bloodborne pathogens must enforce universal precautions to prevent contact with blood or other potentially infectious materials; see BP/AR 4119.42/4219.42/4319.42 - Exposure Control Plan for Bloodborne Pathogens for a detailed exposure control plan and BP/AR 4119.43/4219.43/4319.43 - Universal Precautions. The following optional section addresses the need for students to follow similar procedures.

Students and staff shall observe universal precautions in order to prevent exposure to bloodborne pathogens and to prevent the spread of infectious diseases.

(cf. 4119.42/4219.42/4319.42 - Exposure Control Plan for Bloodborne Pathogens)
(cf. 4119.43/4219.43/4319.43 - Universal Precautions)

The Superintendent or designee shall inform students of the precautions to be used in cases of exposure to blood or other body fluids through injury, accident, or classroom instruction.

(cf. 5141 - Health Care and Emergencies)
(cf. 6145.2 - Athletic Competition)

Students with Infectious Diseases

Note: In *Thomas v. Atascadero Unified School District*, a federal court held that AIDS is a disability under Section 504 of the Rehabilitation Act (29 USC 794) and that a student with AIDS cannot be excluded from school without evidence that the student poses a risk of transmission of the HIV virus to classmates or teachers. The following paragraph extends this protection to students with any bloodborne pathogen infection. 8 CCR 5193 defines bloodborne pathogens to include the hepatitis C virus in addition to hepatitis B virus and HIV.

The Superintendent or designee shall exclude students only in accordance with law, Board policy, and administrative regulation. Because bloodborne pathogens such as hepatitis B virus, hepatitis C virus, and human immunodeficiency virus (HIV) are not casually transmitted, the presence of infectious conditions of this type is not, by itself, sufficient reason to exclude students from attending school.

(cf. 5112.2 - Exclusions from Attendance)
(cf. 6164.6 - Identification and Education Under Section 504)

Note: Both federal and state law (20 USC 1232g and Education Code 49060-49069) require that student health information remain confidential. In the event that a parent/guardian authorizes the district to disclose the fact that the student has an infectious disease, such as the student's HIV status, it is recommended that any decision to inform staff should be made by the Superintendent or designee, the student, and his/her family, in consultation with district legal counsel.

Parents/guardians are encouraged to inform the Superintendent or designee if their child has an infectious disease so that school staff may work cooperatively with the student's parents/guardians to minimize the child's exposure to other diseases in the school setting. The Superintendent or designee shall ensure that student confidentiality rights are strictly observed in accordance with law.

(cf. 4119.23/4219.23/4319.23 - Unauthorized Release of Confidential/Privileged Information)
(cf. 5022 - Student and Family Privacy Rights)
(cf. 5125 - Student Records)
