## **SUSTANABLE EARTH CLUB:**

The majority of electronics have lithium ion batteries that contain cobalt, a toxic element. Most of these electronics are burned or throw in landfills, releasing toxic fumes into the environment. YOU can do something about this. Over the break collect old unused electronics and bring them to the collection bins that will be in the Jungle Hallway. Sustainable Earth Club will be recycling these electronics so the material can be reused and not harm us or the environment.

## **DRESS UP DAY:**

This Friday is holiday wear day! Bust out your best holiday outfits for the last day of school before winter break.
