Dear Chemistry Parents,

We look forward to a wonderful and exciting year full of labs that will enthuse our students and facilitate learning. In our classes, we will be doing quite a few labs on a micro scale, but a few labs are not and are a bit more costly. We would still like to include these labs with your help. A few labs we like to do are the isotopes lab where we use candy representing atoms, the half-life of licorice discovering radioactive half-lives, the holiday card lab where we uncover the ideas of solubility using food coloring, shaving cream and card stock, the limiting reactant S'mores lab, and finally one of our last labs of the year where we bring Sub Zero Ice Cream to our classrooms to show us some amazing properties of liquid nitrogen, including creating ice cream with it. We are asking for voluntary donations to make these labs possible. Please fill out the form if you are able to donate to our Chemistry Labs. Thank you in advance! The Chemistry Department at Westlake High School

Name: ________________________________________ Student’s Name: __________________________________

- I can donate money and have included it in this tear-off in the amount of $ __________
  Cash or check is accepted. If you are donating a check, Please make it out to Westlake High School, and in the memo write: Chemistry Lab Fund

- I can donate item(s) such as candy, cups, food coloring, shaving cream, or card stock. Please do not purchase these items yet. We will contact you so there are not duplicates.
  The best way to contact me is email: ________________________________________________
  Phone: _________________________________ the best time to reach me is: ___________

- Also, we can never have enough white or colored printer paper or Klenex donated for your students’ use.
