1. What are the two major mountain chains that border the great mid-continental basin drained by the Mississippi River system?

2. What great geological event explains the formation of the Great Lakes, the St. Lawrence River system, the Columbia-Snake River system, and Great Salt Lake?

3. How did this same geological event isolate the human population of the Americas from that of Asia?

4. Given the original geographical origins of the Indian populations, in which direction did their earliest migrations across North America occur: from southeast to north and west, from southwest to north and east, or from northwest to south and east?

H. Map Mastery

Map Discrimination

Using the maps and charts in Chapter 1, answer the following questions.
