Jeanne Valentine Assistant Superintendent

<u>MEMORANDUM</u>

To: VOLUNTEER

Subject: Tuberculosis (PPD) Risk Assessment

In accordance with California Education Code Section 49406, and Health and Safety Code Sections 121525-121555, the Conejo Valley Unified School District requires that persons be examined to determine if he/she is free of active Tuberculosis, no more than sixty (60) days prior to volunteering. The examination consists of a TB Risk Assessment Questionnaire certified by a health care provider, and if necessary, an intradermal Mantoux Tuberculin Skin Test (TST), which if positive (10mm or more), must be followed by a chest X-ray. If you had a positive reaction to a prior skin test, proceed with a chest X-ray.

In the case of pregnancy and an intradermal TST that is positive, an X-ray examination may be delayed until after delivery, upon request of the volunteer's physician. In the interim, the physician must certify that the volunteer shows no symptoms of Tuberculosis and to the best of his/her professional judgment, presents no health hazard to students.

The Tuberculosis Risk Assessment can be obtained at **your cost** by presenting the attached form to the medical office of your choice or to any local urgent care facility. Your own physician or any other health agency may provide proof of a current Tuberculosis clearance.

It will be your responsibility to <u>return</u> the Tuberculosis (PPD) Risk Assessment, once it is completed, <u>to the school office where you plan to volunteer</u>. This assessment is good for four years, so you may want to make a copy for yourself.

THE TUBERCULOSIS RISK ASSESSMENT MUST BE COMPLETED BEFORE VOLUNTEERING.

FAILURE TO COMPLY WILL RESULT IN THE SCHOOL DISTRICT NOT BEING ABLE TO ACCEPT YOUR OFFER OF VOLUNTEER SERVICES.
