

COURSE TITLE: Woodworking Principles

Level of Difficulty	Estimated Homework	Prerequisites
Moderate	0-30 Minutes	District: none Department Suggestion: none

Course Description:

Traditionally referred to as wood shop. This course is aimed at any student interested in learning about the world of woodwork. The students will learn how to work with a variety of machines and processes found in the carpentry trades. Students will have the opportunity to begin limited use of the woodworking machines. During this course students will learn how to plan, select and use materials, including tools and machines to produce a finished product. Emphasis will be on safety and quality of workmanship. This class is about the world of work and each student will need to be in attendance and participate fully in all activities. Materials cost will be applied to each project the student keeps. \$45
