
Puberty Changes and Sexual and Reproductive Anatomy

Session 3:

Puberty Changes and Sexual and Reproductive Anatomy

Goals:

- Define proper terminology and function for sexual and reproductive anatomy
- Provide tools for students to take initiative over their personal care

Objectives:

- Provide names, functions, and anatomical locations of at least three female body parts
- Provide names, functions, and anatomical locations of at least three male body parts
- Articulate three changes that occur during puberty to male bodies, female bodies, and all bodies
- Identify two things they can do to take care of their changing body

Anonymous Question Box

Introduction to the Anonymous Question Box:

The Anonymous Question Box is a way for students to ask questions that they may not feel comfortable asking during class time, though students are encouraged to ask lots of questions during class time as well.

Anonymous Question Box Guidelines:

- Everyone must put a paper in the box. If students do not have a questions at that time, they can write a statement about what they learned in class that day, a specific topic of interest, or write "no question". This ensures questions remain anonymous.
- No Names. Questions are anonymous and are not to be used t hurt or embarrass others. Questions with names on them will not be read out loud.
- No personal questions of the instructor.
- Nobody can take anything out of the Question Box, except for the instructor.

Puberty: Changes, Changes, Changes

Female Bodies, Males Bodies, All Bodies

Hips get wider and waist gets narrower

Vagina gets moist and underwear can be sticky

Hair grows around the vulva

Periods start (called menstruation)

Ovaries start to release an egg each month (called ovulation)

Feelings get more intense

The whole body grows taller and bigger

Mood swings – feelings can change quickly

Hymen

= a thin piece of skin partially covering the opening to the vagina

Vulva = outer female anatomy

Taking Care of Me: Personal Hygiene

Hygiene

Taking care of our body is very important so we can keep ourselves healthy!

How do you keep your body clean?

Brushing your Teeth

Use a **toothbrush** and **toothpaste**

Brush 2 times every day (morning and before bed)

Washing your Body

Wash your body
every day
(with **soap!**)
in the shower
to get rid of
dirt and germs

Washing your Hair

Wash your hair in the shower to get rid of dirt and oil

Shampoo and **conditioner** help clean and make hair smell nice

Caring for your Hair

Use a **brush** or **comb**
to keep your hair
neat and untangled

Smelling Nice

Underarms can sweat and sometimes smell bad

Put on **deodorant** every day to help underarms stay dry and smell nice

Getting Dressed

Put on clean clothes
(shirt, underwear, socks)
every day

Washing your Hands

Wash hands with **soap** after coughing, sneezing, or using the bathroom
